WORK EXPERIENCE

Data Analyst

CargoSprint / 2026 - Currently

- Main Data Analyst for the Finance Operation. Leading the analytics effort through results-oriented analysis and long term projects focused in maximizing revenue.
- Led the effort to transition from Tableau to Power BI by rebuilding and architecting the new executive leadership data suite, eliminating redundancy and data inconsistency.
- Architected the main SQL source of truth supporting a finance operation of 50+ users.
- Proposed and developed various ad-hoc analysis for detection and capitalization of opportunities.
- Leveraged AI in order to develop new analytic pipelines.

Business Intelligence Engineer

NTD Software / 2025 - 2025

- Analyzed logistics data with Python and SQL to identify new revenue opportunities.
- Drove client revenue growth by architecting Power BI dashboards that visualized Key Metrics, Multistop Opportunities, and other revenue generating metrics.

Data Analyst - CPFR

Birdman / 2024 - 2025

- Generated a 48% increase in customer purchase orders by analyzing sales data to identify and correct inventory gaps with elasticity analysis.
- Served as the lead and only data analyst for the entire brick-and-mortar operation, developing and cleaning datasets for executive-level reporting.
- Built and automated key Power BI dashboards used by executives to guide sales strategy decisions.

Account Manager

HPE / 2024 - 2024

- Account manager for tech customers. Focused in analytics for sales strategy purposes.

CSR Canada

GEODIS SCO / 2021 - 2024

- Team leader for the Canada operation, working on solving supply chain constraints using data analysis, KPI review, and process optimization.
